

Welcome to the Plant Wild Newsletter December 2020

**We would like to say a big thank you to all our 2020 customers.
We enjoy working with every customer, however large or small their
garden or planting area may be.**

**As a family based business, we grow and supply wildflowers
for gardens, community areas and businesses throughout the UK to
help
bring more wildlife to your world.**

Looking forward to 2021:

At Plant Wild, we have been busy preparing for Spring, and we'd like to share with you a few things to look forward to for next year in the garden. We still have a good range of 9cm wildflower pots available now online and some of the Spring specific plants are available too.

Many will be outside in the garden a little less right now, with the cooler weather, shorter days, and Christmas around the corner. But even so it allows for the garden to settle, the soil to rejuvenate and habitats in the garden to establish and protect overwintering wildlife to be ready for Spring. It's now a great opportunity to get ahead, make your 2021 garden list and continue the great work started in 2020.

Spring bulbs:

Our range of [Spring bulbs](#) are planted in peat free compost in kerbside recyclable pots to be ready to send out to you already rooted and shooted in Spring.

Including Star of Bethlehem, English Bluebells, Tenby daffodils, Wild daffodils, Single Snowdrops, Winter aconites and Wood anemones. plus more! Check out the website for the individual details.

Some potted bulbs are already available, on the website, and we will be adding stock as it develops in the coming months. If you would like any potted bulbs reserved for you just get in touch.

Plug plants:

The best time to plant large numbers of plug plants is March – September, although they can be planted all year round in small quantities providing the ground is not frozen or waterlogged. So, looking towards the Spring plug plants, we have been busy propagating new stock. Our seeds are sown in peat free compost ready to transplant into their plug trays and once rooted they are hardened off outside. At Plant Wild we grow slow, so no heat is used in the polytunnels.

To see more information regarding our plug plants visit our [Planting tips and advice page](#)

The Tortoise edible collection for the foraging Tortoise.

New plug plant collections:

Our [plug plant collections](#) contain a selection of Plug plants for different areas/uses. We are excited to have added the following new collections this year:

The Small garden selection – 27 plug plants of 9 wildflowers suitable for a small garden or containers.

The Tortoise edible collection – 27 plug plants of 9 wildflowers suitable and safe for your Tortoise to forage.

Our large collections will be available in the Spring on the website; The small garden collection can be pre ordered for Spring now and the Tortoise collection is available for delivery now.

Gifts:

Our [wildlife gift range](#) is available all year round, together with our e - gift cards. There is still time to order for Christmas with our last shipping date being 17th December

Or why not keep in mind a gift for your wildlife enthusiast as a birthday present or special occasion in 2021. We will be adding to this range in 2021 with a super range of Watercolour Botanical prints.

*Our e gift card can be purchased for any amount from £5 upwards.
Ideal for those last minute garden gifts*

Happy Christmas from all The Plant Wild Team And Best Wishes for the New Year.

We look forward to welcoming you back to Plant Wild in 2021
